PROJECTS

PROPERTY RENTALS TRACKER (FULL STACK - MERN)   *personal project*

- An rental tracking app for a team of leasing agents. The app is meant to track properties while in the leasing stage *i.e. unoccupied or pending-lease*

Tech Stack / Tech Features Overview:

- Custom css using styled-components
- Custom middleware for custom error messages
- bcrypt and jsonwebtoken for authentication
- Material UI tables and modals
- axios for data fetching
- express-async-errors for cleaner code

Deployed app: https://property-rentals-tracker.herokuapp.com/

CRYPTO DEGEN (FRONT-END - REACT)   *personal project*

- Cryptocurrency scoop from Reddit API, real-time crypto market data using CoinGecko API, and crypto trade simulator*(coming soon)*.

Tech Stack / Tech Features Overview:

- Built using Chakra-UI components
- Crypto market data fetched using CoinGecko API and axios
- Latest posts from Reddit API

Deployed app: https://crypto-degen.herokuapp.com/
